

## Guitarist Gary Moore chooses a custom Carlos CP-1A VIP

Carlos Juan designed and installed his custom CP-1A VIP in Gary Moore's acoustic guitar on March 22nd during the 2009 German Tour and the comment was... **It's great!**. George Hoffmann, tour manager reveals a secret that this is the 1st time Gary Moore has ever let anyone work on his guitars except his personal tech. It wasn't until recently that the legendary guitarist having previously checked most, if not all, acoustic guitar pickups available on the market and having almost given up finding one, decided to give the Carlos Juan pickup a try. „I am very pleased to be participating in the rebirth of Gary's acoustic legacy" says Carlos Juan.
